## Literature in sport psychology: Listing of authorship and references (1994-2003)

FÉLIX GUILLÉN

*University of Las Palmas de Gran Canaria, Spain*

*This review work aims to offer up-to-date information of the existing publications concerning sport and physical education psychology.*

*It brings together a complete list of authors and bibliographic references published in the English language, concerning sport and physical education psychology, as well as related disciplines, over the past decade.*

*More than 300 references encompassing both scientific and general interest articles, published mainly in USA, Canada, Australia and England.*

KEY WORDS: Authorship, Bibliography, Physical activity, Sport Psychology.

Aim of this review is to offer an up-to-date information of the existing publications concerning sport and physical education psychology, with a wide range covering all the references we could locate in the field, published in the English language since 1994.

To offer the widest possible range were also included books from related disciplines such motor development, motor control and, even, educational psychology within the field of sport, among other areas.

This decision to include texts from other disciplines relates to the topics covered in many cases coinciding with both disciplines and in other cases because these other areas cover topics which are important in sport psychology.

The interest in gathering information from books concerning this discipline could be attributed to the growth in recent years of manuals and studies into this discipline, thus impeding the development of a global vision of what has been published in the area.

---

*Address for correspondence: Félix Guillén, Facultad de Formación del Profesorado, C/. Juana de Arco, 1, 35004 Las Palmas de Gran Canaria (Spain).*

Our aim in this collective work may support researchers, teachers and professionals who apply general sport psychology, as well as other professionals interested in this field.

The review is concentrate on the past decade because Allen (1994) has already published a similar type of study covering the timeframe prior to 1994. Furthermore, up to that date Guillén and León (1995) also published an even more extensive reference listing of titles in other countries and languages.
